

Three Zone Automatic Gas Extinguishing Panel

EX 3001

The Ex-3000 series, three zone automatic extinguishing panel is approved to EN12094-1(European standard for Fixed Firefighting Systems-Components for Gas Extinguishing Systems) and EN54-parts 2 and 4.

The Ex-Extinguishing system detects a fire in the same manner as a fire alarm system, but in addition to sounding alarms, it also controls the release of an extinguishing agent.

The extinguishing agent can take many forms from CO2 through to specialist gases developed solely for extinguishing purposes. The agent is released into the atmosphere in the area where a fire has been detected reducing the density of oxygen in the atmosphere around the fire, thus extinguishing the fire.

The Ex-Extinguishing system is used primarily in areas of significant value/strategic importance to

businesses e.g. computer suites, telecom switch-rooms thus providing cost affective solution to protect your work place.

Features

- User Friendly Graphical LCD Display providing clearer status information and programming routines
- Multiple Languages
- Slide in Labels
- Pass-code replaces physical key for level-2 access (though optional key-switch may still be fitted if key is preferred).
- Time & Date- stamped event log and improved diagnostics
- 3 Year Warranty as Standard
- RS485 for Remote Status Indicators
- User friendly PC Download tool via USB connection
